Small Flying Objects

PRESENTATION UFO

19/11/2020

10.00 – 11.30

The UFO project has received funding by European Union's Horizon 2020 research and innovation programme under grant agreement 873411

Some practical advices for the webinar

- All participants' microphones are muted to avoid any background noise.
- During the presentation, you can write your questions through the Q&A icon. If the icon is not available you can ask them at bouchard@aerospace-valley.com, we will have some time at the end of the webinar to answer your questions.
- The recording and presentation will be available in 48h on the UFO website <https://www.ufoproject.eu/>.
- If you have questions after this webinar, you can contact the speakers directly. Their email addresses are in the next slide.

Information :

- From 10.00 to 11.30 (1 hour 30 min)
- The Q&A will be at the end of the presentation
- This webinar is recorded and will be available on our website <https://www.ufoproject.eu/>

SPEAKERS

Panagiotis TSATSOULIS

Senior associate

CORALLIA - Athens

David GAL-REGNIEZ

Directeur Technique « Contents & Application

MINALOGIC

Nicolas LEVI

Co-founder of Sytizen

Sytizen

Laurent CLERGUE

Product Manager Space Imagery Services

ATOS

Thaddé BOUCHARD

European Project Coordinator

Aerosapce Valley

AGENDA.....

- **Information on the project UFO**
- **Specificities on the Open Call**
- **Methodology and Collaborative Work**
- **Presentation of additional support from ATOS**
- **Q&A**

The main objective of the Webinar is.....

To give you important information on UFO, the Application procedure and invite you to the coming Ideation Sessions

Section 1 - Information on the project UFO

European Project INNOSUP-01

CASCADE FUNDING SCHEME

- Horizon 2020
- Orientation SMEs
- Participation of European clusters
- Transnational cooperation

UFO
Innovation boosted by
Small Flying Objects

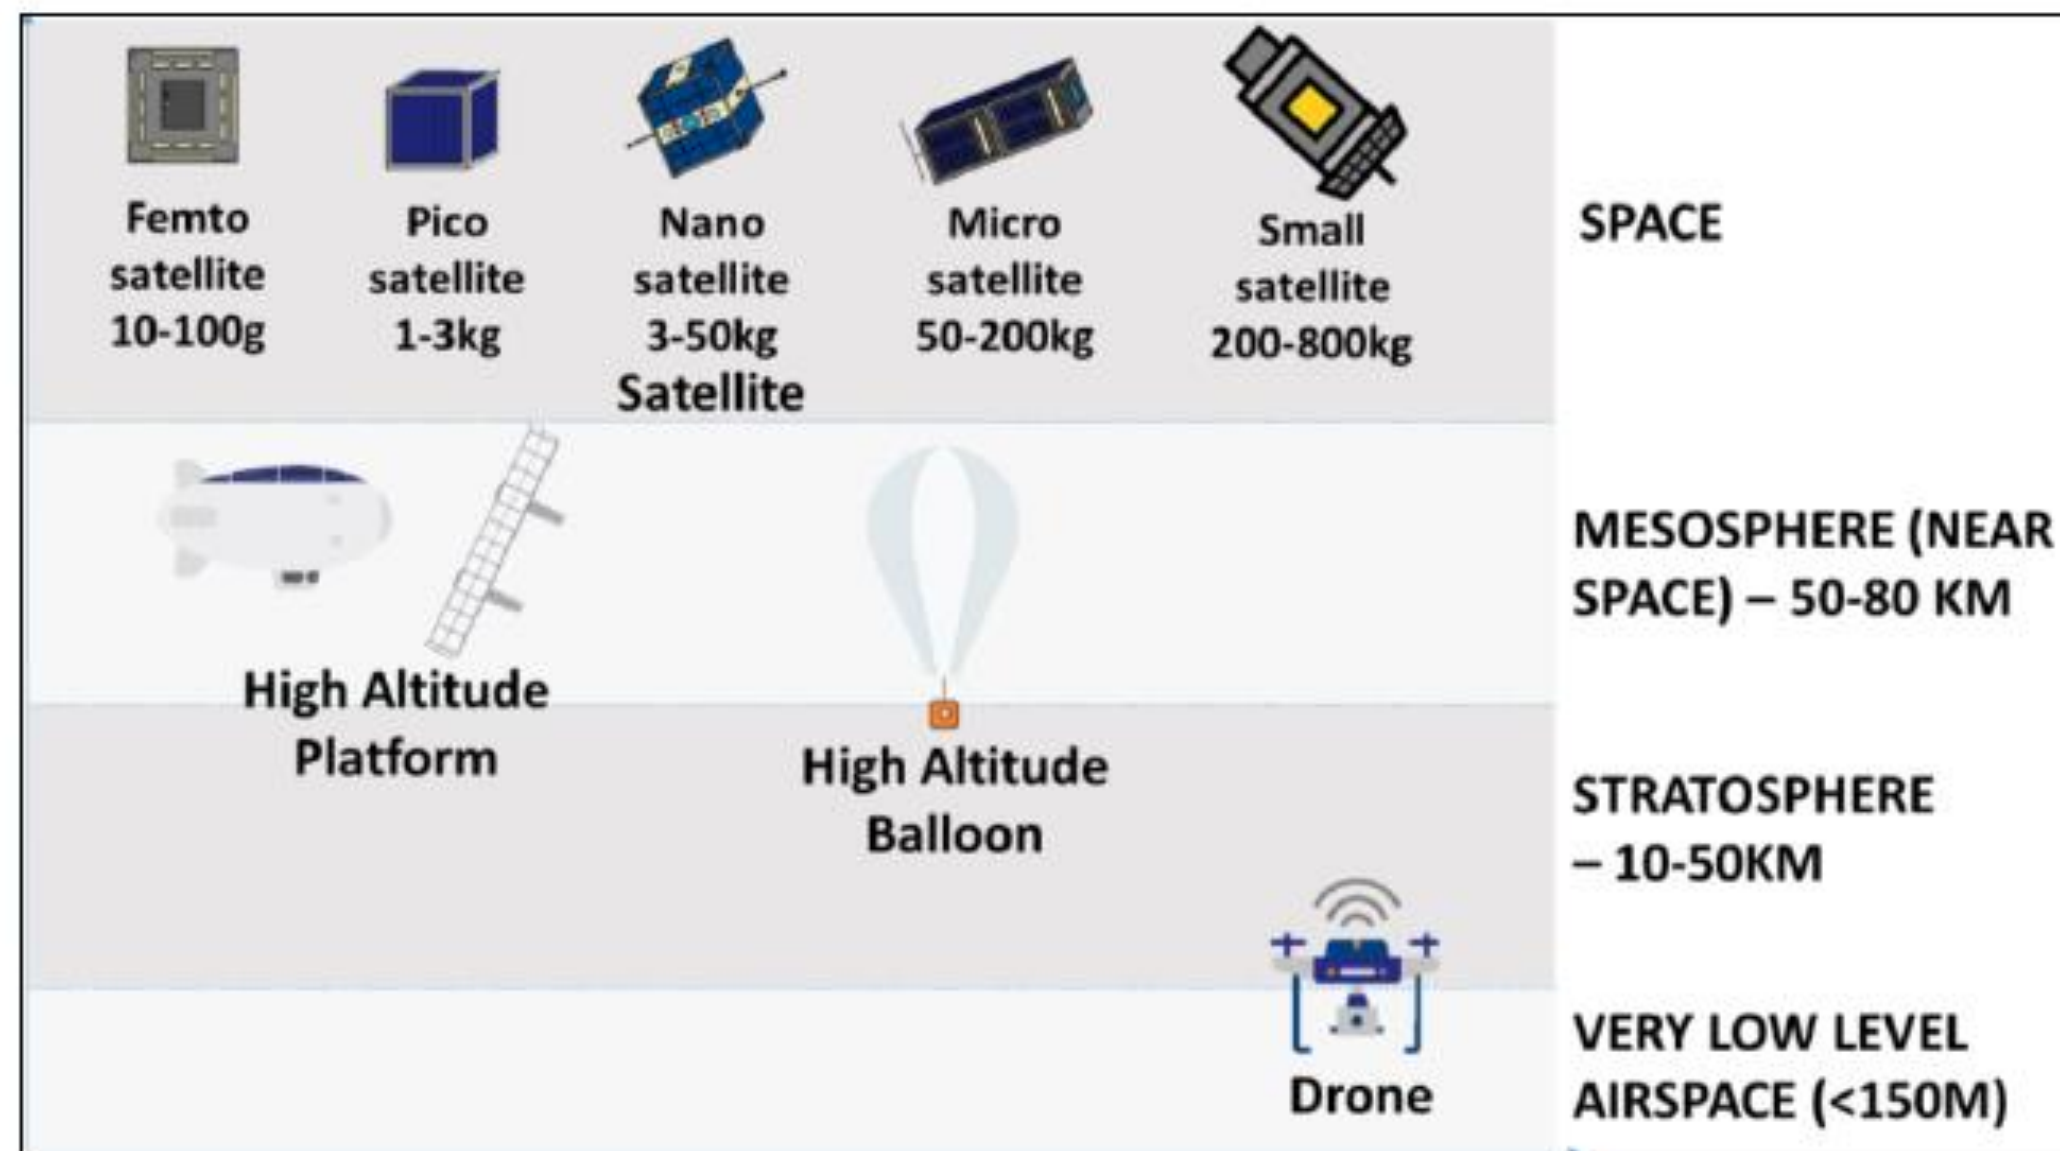

Objective:

Aim at financing collaboration of European SMEs to enhance the value chains of targeted industries by proposing innovative (products or services) integrating new embedded technology solutions in Small Flying Objects (SFO): drones, high altitude platforms systems, small satellites.

Use of the Small Flying Object targeted for 6 industries

Mobility

Environment

Blue Growth

Finance and Insurance

Climate

Digital, Creative and Gaming

Example of embedded technologies

« Digital and nano technologies »

- Data management

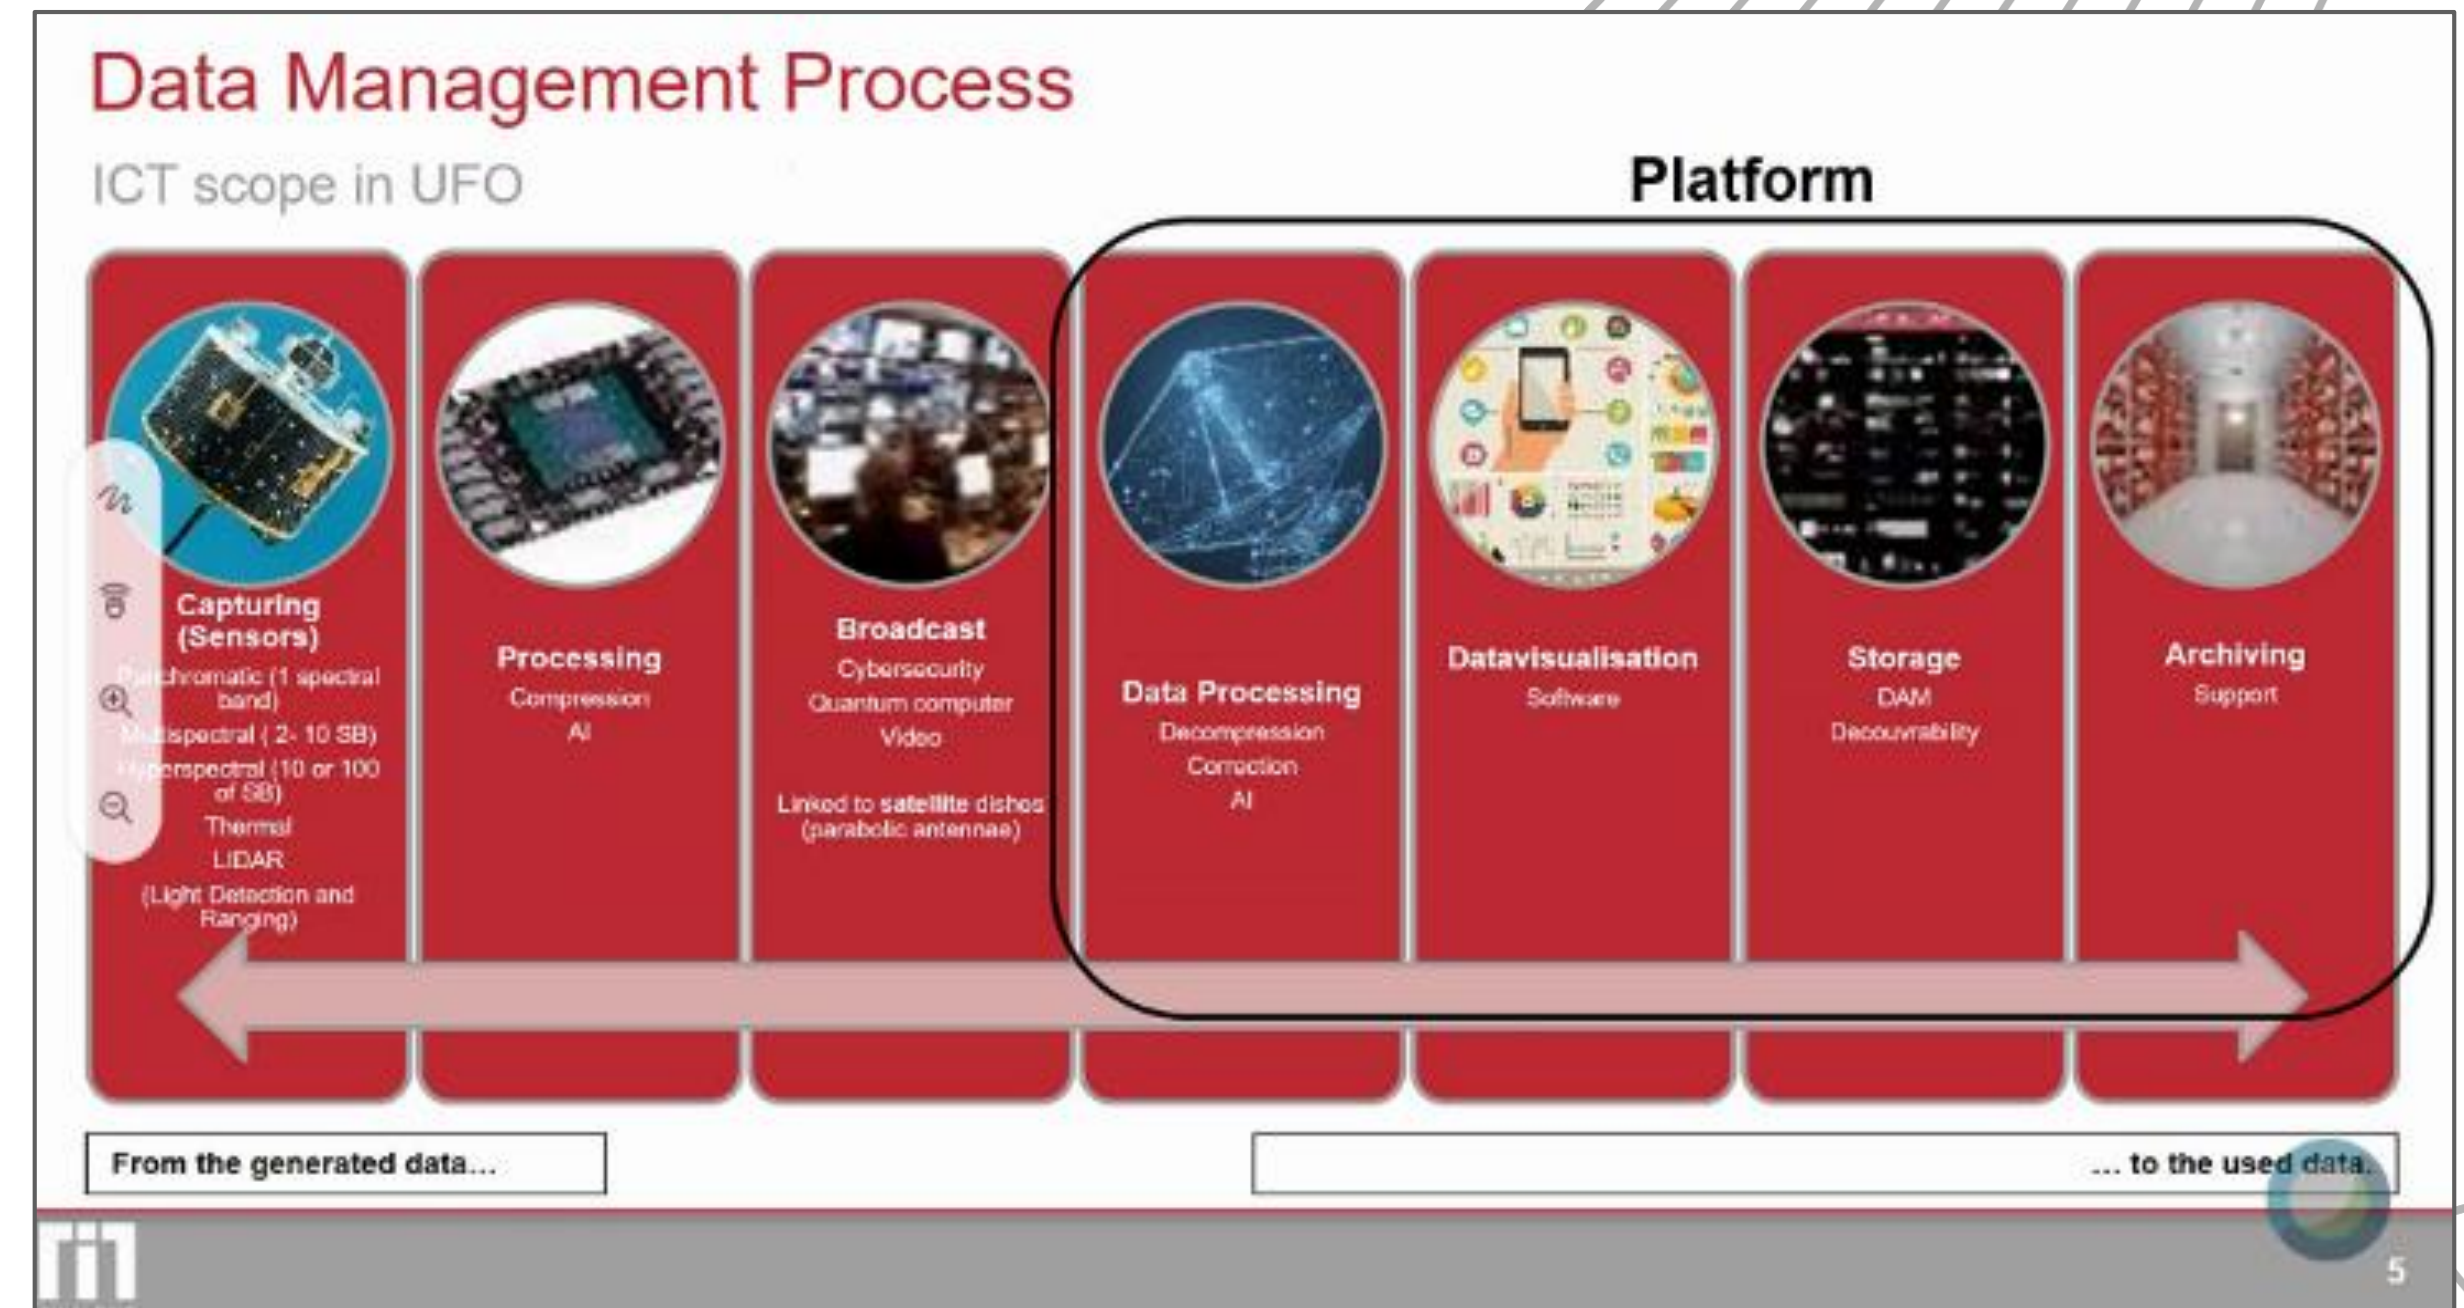

(internal storage, down stream, processors, AI)

- Embedded sensors

(positioning, communication, sensors SAR / Optic)

- Key Enabling Technologies (KETs)

(KETs : nano et microelectronic / nanotechnologies / biotechnology / advance materials / spectroscopy / and advance manufacturing technologies)

Information on the project UFO

Small Flying Objects

Smallsat
Drones
High Altitude Platform systems

Embedded technologies

Microelectronics
Nanotechnologies
Sensors and exploitation solutions

For 6 industries:

Mobility

Congestion, roadworks & asset monitoring
V2X (Vehicle to everything)
Last mile deliveries

Climate

Crisis management
Energy optimisation
Renewable Resources management

Environment

Air quality
Land quality
Fresh water quality

Blue Growth

Combatting illegal, unlicensed and unreported (IUU) fishing
Managing coastal water quality
Metocean monitoring and forecasting

Digital Creative & Gaming

Architecture and Urban planning
Tourism / augmented and new touristic experiences
Gaming; realistic games, advanced virtual and augmented reality

Finance & Insurance

Insurance sector (flooding monitor)
Real State sector / new building construction areas
Economic development / analyse city development

Collaboration between 2 SMES or +

Industries & Examples of Use-cases

Section 2 - Specificities of the Open Call

Q&A

Thank you all for watching this webinar

Registration to the Ideation sessions is here : <https://web-eur.cvent.com/event/e1ff6586-34f0-42de-a978-fee8d041e8b7/summary>
